Project: 1

Xenial India |

Description : It's a manage booking application.

Technologies : React (Frontend), Node JS (Back-end), MySQL (Database)

Team Size : 5

Responsibilities : Worked on the back-end part which has been developed in the microservice architecture. Understand the functionality, coding & manage the repos.

Projects by Self

Project: 1

Todo List |
Developed backend of a 'Todo' app where any user can register and do CRUD in his todo list operation only by logging in. Used JWT for authentication and authorization.

Project: 2

Check Flight Detail |
Developed the backend of a flight price checking application in which admin can add flight detail and price between two cities, and any user can find the detail of price.
Used Json Web Token (JWT) for authentication and authorization for admin login.

EXTRA CURRICULAR ACTIVITIES

- Because of my interpersonal and team management skills, I was selected as a coordinator for 'Zonal Youth Festival'.
- A member of the organizing committee and participated in 'UIET Badminton Championship'.
- Volunteered in the 'International Women's Day' function.
- Volunteered in the 'University Alumni Meet' function.
- NCC **'C'** certificate holder.

EXPERIENCE

- Working with Kogo Tech Labs, New Delhi since August 2023.
